1	2	3	4	5	6	7

The units of SEF are classified in category 5 because the value of the unit may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high. The risk category for this unit class was calculated using historical data. The risk category may not be a reliable indicator of the unit class's future risk profile. The risk category shown is not guaranteed and may change over time. The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.
